### GAWO C: CHIMASULIRO (MALIKISI 15)

*Werengani nkhanu yotsatirayi ndipo muimasulire mu m'Chichewa chomveka bwino.*

#### NATURAL RESOURCES

Natural resources are getting depleted at an alarming rate in our country. There is an inevitable fear that very soon the essential species of flora and fauna will get extinct. That the future generation may not have a chance to know most of these.

What is even more painful is the fact that the development of the country depends largely on these natural resources. In fact what we call technology is nothing other than the transformation of natural resources into something readily usable.

This means that if we have to achieve meaningful development as a country one important thing that has to be done is to replenish the replenishable natural resources.
